**Acura® manual** pipettes are precision instruments combining high-tech materials with exceptional, user friendly ergonomics.

A wide choice of models offers much more than superior performance and makes pipetting safe and comfortable.

#### The Acura® manual line features:

- Effortless activation
- Smart and reliable volume adjustment
- Precision digital display visible at all time
- Justip™ adjustable tip ejector fitting most tips
- Swift-set user calibration system
- Shock, UV-light and autoclaving resistance
- CE certified IVD 98/79 EEC

your expectations – our tradition

## ► Most comfortable pipetting

The line fits everybody's hand with or without glove. Ergonomic shape, light weight and soft plunger travel care for optimal comfort.

## ► Smart and reliable volume adjustment

State-of-the-art micrometric setting is performed smoothly and precisely by turning the push button.

Finely machined click-stops and free rotating cap prevent any unwanted volume alteration.

## ► Digital display always visible at a glance

Located on the front of the instrument, the display window allows the user to comfortably read the set volumes at any time during pipetting. A comforting reassurance for the user.

## ► Acura® manual 825/835

### Triopack

Nine different packs up to 10 mL, each containing three adjustable micropipettes, to cover all individual requirements in any research or routine application. Available at attractive budget prices, they match with today's budget constraints.

## Universal micropipettes

The classic Acura® manual 825 is intended for all applications. It brings convenience, comfort, safety and sturdiness. A wise choice for your laboratory.

## Work station Twister™ universal 336

Rotary stand holds up to six single channel pipettes of most brands. Seven translucent colours to choose from.

## In-line™ universal 337

Space saving stand holds up to seven single channel pipettes of most brands. Anti-slip pads guarantee bench stability. Available in five pastel colours.

## Extra sharp micropipettes

Derived from the Acura® manual 825, the 826 XS line was designed with the research scientists in mind. Shorter, smoother, lighter in weight, the eight models offer key features aiming to excellence in pipetting.

#### Narrow conical shaft end

Small diameter offers easy access to microtubes.

#### Short shaft

Length reduction greatly enhances precision of hand movement and guarantees superior drivability.

#### A must for research scientists

The extra sharp pipette is optimal for any fine applications such as pipetting in microtubes or microplates.

#### ► Tip ejection - easier than ever

Most ergonomically positioned, the large surface, soft padded ejector button ensures low-pressure activation. In addition to ease of tip ejection, the shaft height adjustment system called *JustiP™* (4 mm span) - controlled by efficient click-stops - allows a wide selection of tips to tightly fit the nozzle.

#### ► Extra smooth activation

Unique tightness lip seal and new springs provide ultra-smooth pipetting, reducing hand fatigue while working.

Pipetting		Overshoot	
Start	End	Start	End

\* 1 Newton (N) ~ 0.1 kilogramme force (kgf)

Above forces, measured on a 20 - 200 µL model, are indicative of very limited finger efforts. Yet, the overshoot stop offers a clear tactile indicator.

#### ► Acura® manual XS 826 TwiXS pack

Six different packs up to 1000 µL, each containing two adjustable micropipettes and a free pipette holder, to cover all individual requirements in any research application. Available at attractive prices, they match with today's budget constraints.

#### ► Nozzle protection filter

Macro models accommodate interchangeable nozzle filters for added protection against liquid overflow and barrel contamination.

#### ► Pasteur pipette adapter

Optional adapters allow fitting of glass Pasteur pipette on 2 and 5 mL models in addition to Polypropylene tips. The adapters include two O-rings guaranteeing proper holding and tightness of any standard 2 mL Pasteur pipettes ( $\varnothing$  7 mm).

#### ► Smarties caps colour coding at will

Free rotating colour caps protecting against unwanted volume alteration, can be changed for individual, lab or department identifications. Pick among 14 different colours or choose the smartie mix including all of them for unlimited combinations.

#### ► Shelf pipette holder 332 for two instruments

Fitting micro, macro and/or multi-channel pipettes, its attractive design accommodates all Acura® and Calibra® instruments. The self-adhesive strip supplied ensures lasting attachment on any surface.

## Fixed volume micro and macropipettes

They show most stable performance and provide consistent results for any analytical or routine tests.

No risk of erroneous volume setting. Available in a selection of micro sizes from 1 to 1000  $\mu$ L and macro volumes models of 2, 2.5, 5 and 10 mL.

### ► Optimal working position

In addition to the ergonomic design and perfect hand fitting of the pipette, the multichannel volumetric module revolves to allow the selection of the best working position.

### ► Adjustable tip ejector

Height of tip ejector can be adjusted in no time within a 4 mm span to perfectly match to tip used. Bowed shape of ejector head guarantees effortless, easy sequential tip ejection.

### ► All purpose reservoirs

Well adapted for multichannel pipettes, the reagent reservoirs offer various shapes in different configurations at economical cost. See page 10.

#### ► Instant calibration

All Acura® manual models include the swift-set user calibration system - with integrated key and locking mechanism - making tedious procedures a thing of the past. Easy and precise, it is in full compliance with international standards and recommendations.

#### ► Safety seal sticker

Though easily removed when needed, the switch protection seal is autoclaving resistant. Replacement service stickers (5 ea.) included with each pipette.

#### Calibration seal stickers

Replacement seals	25 / pk	1.825.025
Replacement seals	100 / pk	1.825.100

#### ► Minimum maintenance / sterilisation

Easy disassembling for thorough cleaning.

Sterilisation achieved by autoclaving the instrument fully assembled (121°C / 250°F, 20 minutes).

### Standards and compliance

All Acura® manual models are designed to perform in accordance with national and international standards such as ISO 8655, GMP, GLP, NCCLS.

They comply with the CE directive IVD 98/79 EEC (in vitro diagnostic medical devices).

### QC and warranty

Performance values are obtained with bi-dist. water at constant temperature ( $\pm 0.5^\circ\text{C}$ ) between 20 and 25°C, in accordance with ISO 8655.

Each micropipette bears its own serial number and passes strict performance control attested by an individual QC certificate.

Three-year warranty.
