

The Next Standard

Built on a legacy of reliability in online chlorine analysis, the advanced design of the CL17sc reduces routine maintenance touch time and provides powerful diagnostic features and enhanced connectivity. The result is less hassle, minimised risk of data loss, and even more reliable information to empower your decision making.

The Next Standard in Chlorine Analysis

Distributed By:

Wondering how the CL17sc can help your team?

Q: Are you spending too much time conducting routine maintenance on your current analyser?

A: Routine maintenance can take valuable time away from other operations, increase downtime, and increase demand on personnel.

The CL17sc reduces your routine maintenance touch time with simplified tubing replacement, user-programmable alerts, and step-by-step, on-screen workflows.

Q: Do you lack confidence in your data, or are you unsure if your analyser is working as intended?

A: The CL17sc has diagnostic features like a colorimeter window and a multi-colour status light, which lets you know at a glance that your instrument is operating as intended. And with a flow sensor, flow readings are displayed on screen. Low flow will trigger an alert so you can quickly and easily identify issues with sample flow. A measurement cycle indicator allows users to know what stage the measurement cycle the instrument is in at all times.

Q: Do you need an easier way to manage data?

A: Does your current chlorine analyser lack onboard data logging? Are you missing critical segments of data? Pairing the CL17sc with Hach's SC controller platform allows for internal data logging, external analog and digital communication alternatives, and multi-parameter instrument flexibility.

Q: Do you need a partner to support you throughout the life of your analyser?

A: Let Hach Service help you protect your investment and peace of mind. A full portfolio of service plans is available to support you beyond routine maintenance and free up your internal resources to focus on other priorities.

Maintenance Made Easy

The CL17sc reduces your routine maintenance touch time with simplified tubing replacement and step-by-step, on-screen instructions for routine maintenance.

Peace of Mind Through Comprehensive Diagnostics

With upgraded features like a flow meter, colorimeter window, multi-colour status light, and predictive diagnostic software, you know your instrument is operating as intended.

Expanded Connectivity Increased Flexibility

By pairing the CL17sc with Hach's SC controller platform, your options increase significantly: internal data logging, external analog and digital communication alternatives, and multi-parameter instrument flexibility.

The CL17sc is one of Hach's Claros Enabled products, which has the ability to share measurement data and status information with Claros – The Water Intelligence System from Hach®. Claros provides greater confidence in your data, resulting in improved efficiencies in your plant's operation.

With Hach Service you have a global partner who understands your needs and cares about delivering timely, high-quality service you can trust. Our Service Team brings unique expertise to help you maximise instrument uptime, ensure data integrity, maintain operational stability, and reduce compliance risk.

Pick&Ship is a subscription program from Hach for supplies, like reagents, maintenance kits, and other items you need on a recurring basis.
