with Drainback Feature

CRVpro

Your Robust Vacuum Pump

Discover the evolution of two-stage rotary vane vacuum pumps. Built to last. Born to perform. And designed to simplify your work. Meet the robust vacuum pump series – CRVpro.

COOL RUNNING

Enhanced air flow allows the pump to run 10°C cooler than standard rotary vane pumps. The lower temperature leads to reduced chemical activity within the pump and slows down rates of oil consumption.

INTERNAL SURFACE PROTECTION

Inside surface of the oil case has a PTFE coating and the outer surface of the pumping module has a black oxide coating. Both coatings act to slow metal corrosion and, when coupled with foreline traps, extend service interval.

LARGE OIL CAPACITY

Chemical vapors that sublime from the foreline cold trap into the pump oil are more diluted due to the larger oil capacity. This minimizes the rates of oil breakdown and reduce chemical attacks within the pump.

HIGHEST RELIABILITY

LONG PRODUCT LIFESPAN

LESS MAINTENANCE

EXTENDS SERVICE INTERVAL

YOUR BENEFITS

Highest reliability for stable operation and long product lifespan

- Reduced risk of chemical attacks and oil breakdown by diluting chemical vapors with a larger oil chamber
- Slowing down corrosion by cool running operation
- Provides a measure of protection from sublimed chemical vapors with coating on pump module and oil case

Extended oil change intervals for less maintenance costs

- Less oil consumption by cool running operation
- Extended usability of oil due to high dilution effect by a larger oil chamber

1 LOW NOISE LEVEL

Exceptionally quiet for undisturbed work.

- FORCED OIL LUBRICATION
 - Ensures moving parts are bathed in fresh oil. Equilibrates temperature, minimizes oil breakdown, and prolongs mechanical life.
 - ANTI-SUCK BACK VALVE
- Prevents oil from being sucked into application in the event of a power failure.

4 GAS BALLAST WITH INERT GAS OPTION

Minimizes entrained chemicals in pump oil. Protects pump from condensable liquids from application such as water, acetyl nitrile, etc.

5 cul and ce certification

Compliance with local regulations and safety directives for safety operation.

6 SIZED TO FIT YOUR APPLICATION

Modern and compact design to fit different applications and performance requirements.

DUAL VOLTAGE MOTOR

Dual voltage motors meet IP54 standard. Motors of CRVpro 2,4,6,8 are switchable from 115Vto 240V for global use excluding 100V and 200V pump versions. Each pump includes power cord suitable for country use.

Note 1:Requires a hose barb adapter, included in pump versions with suffice -01.Note 2: Dimensions listed are when handle is removed. Handles are included in all CRVpro pumps.

ORDERING INFORMATION

Every pump is supplied with Welch vacuum pump oil, two centering rings, and two clamps. Ready for use after oil filling.

DESCRIPTION

115V/ 60Hz; 1phase motor with line cord US-plug (115VNEMA 5-15),hose barb adapter (NW16 5/8"), flange adapter NW16 to NW25.

115V/ 60Hz; 1phase motor with line cord US-plug (115VNEMA 5-15);3/4" Flare fitting for refrigeration connection.

115V/ 60Hz; 1phase motor with line cord US-plug (115VNEMA 5-15);hose barb adapter (NW 25 3/4").

220-240V / 50Hz; 230V / 60Hz; 1phase motor with line cord EU-plug (CEE 7/4), line cord US-plug (230V NEMA 6-15). hose barb adapter (NW25 3/4"). CRVpro 2,4,6,8include flange adaptor NW16 to NW25.

220-240V / 50 Hz; 230 V / 60 Hz, 1 phase motor with line cord EU-plug (CEE 7/4), line cord UK-plug (BS1363), line cord US-plug (Nema-5).

220-240V/50 Hz, 230V/60Hz with CN Plug (AS/NZS 3112).

208-230/460V; 50/60Hz, 3 phase.

NEW Pump with explosion proof motor. 115V/208-230V,60Hz, 1phase, cUL listed.

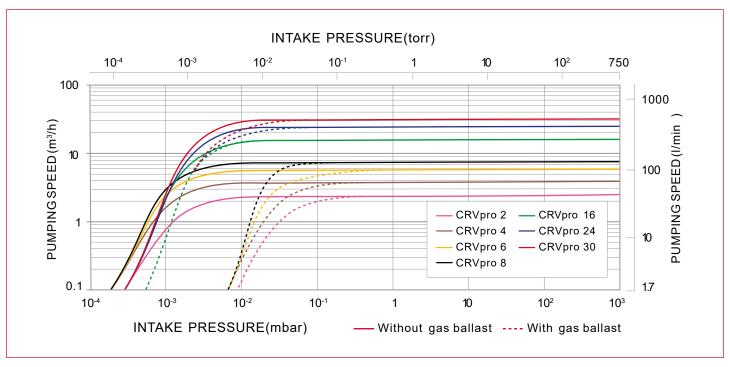

NEW Pump with explosion proof motor. 110/220V,50 Hz.

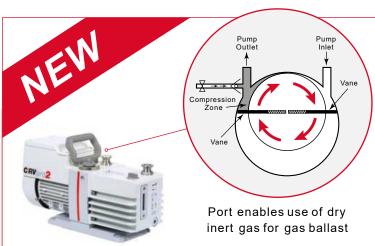

Seal kit. Includes all seals which should be changed when performing maintenance.

Service kit. Includes seals and high wear parts such as vanes that may need to be changed when performing maintenance.

Side fitting to connect insert dry gas via 3.5mm ID flexible tubing

PERFORMANCE

NEW CRVpro GAS BALLAST SYSTEM

System allows inert dry gas or outside air to be injected with a M5(f) inlet port. Gas ballast reduces condensable vapors in the oil case by introducing a small amount of air into the compression area in the second stage of the pump. This reduces condensed vapor from mixing with pump oil (which extends service intervals by maintaining oil integrity) while slightly degrading ultimate vacuum. Some applications benefit from inert dry gas instead of air.

ACCESSORIES

PREMIUM VACUUM PUMP OIL

8995P-15

A triple-distilled hydrocarbon oil using severely hydrotreated base stock is designed to resist breakdown at higher RPMs and and operating temperatures of direct-drive vacuum pumps. This hydrotreating virtually eliminates aromatics and sulfur to give good resistance to sludge and varnish formation over time in corrosive environments. The absence of inhibitors and additives reduces the contamination risks when oil interacts with a user'schemistry. Premium oil enables direct-drive vacuum pumps to maintain the highest vacuum performance over time. The oil is light yellow.

- Low vapor pressure
- Designated for high RPM direct drive vacuum pumps
- · No additives or inhibitors to react with user chemistry
- Recommended for Welch direct-drive vacuum pumps

OUTLET ACCESSORIES

NEW WELCH EXHAUST FILTER WITH COALESCEDOIL DRAINBACK FEATURE

- Coalescedoil drains back into pump oil case to reduce oil consumption and enables a clean work space
- Exhaust can be directed into existing fume hood
- Reduces pump noise
- Filters to 0.3 micron particle size
- · See table below for sizes, connections, and Welch Pump compatibility
- 1417Ehas NW16 connections. 1417Fhas NW25 connections
