Camlab PPE is now available on the APUC Framework

Camlab Ltd is pleased to announce that a selection of our Personal Protective Equipment (PPE) range is now available on the new APUC Framework Agreement - Lab1013 AP. Camlab has been awarded a range of items from market leading brands of safety products in the following lots...

Lot 1 – Laboratory Personal Protective Equipment
Lot 7 – Gloves

Helping you choose the safest option

We know there is a bewildering choice of products available in the safety market today, which is why we take care to ensure our customers are using the right product for the job. Our specialists will make sure they understand your application, recommend the right product and make sure you get it when you need it.

Graeme Neil

Graeme is your local contact and covers APUC and the Scotland territory for the entire camlab product range. Graeme supports our PPE range and can also provide in depth application advice on our other instrument and consumable ranges.
gneil@camlab.co.uk

John Watkin

John has over 27 years technical experience with PPE for the laboratory and industrial market. Many customer have benefitted from Johns advice over the years both in terms of improving their personal protection and getting the best value for money.

One Risk One Product

Some examples of the items available through the framework are shown below from 3M, Shield scientific, Ansell and Kimberly Clarke. If you would like any support on any of our products please contact one of our specialists or the sales office directly.

About Camlab

Camlab has over 65 years trading and 500 years of unrivalled employee experience covering the supply, installation, support, repair and maintenance of water analysis & process instruments, life science instrumentation, laboratory equipment, personal protective equipment and consumables for research and industry. As an employee owned organisation, everyone at Camlab has a stake in the business and is motivated to take excellent care of our growing customer base.

Having recently acquired Industrial & Scientific Supplies, Camlab now has an unrivalled range of safety equipment and workwear for the laboratory. We provide expert technical advice on these and a wide choice of quality lab products to help you select the right product for your requirements. Additionally, with a highly trained and skilled workshop repair team in Cambridge, field based repair & maintenance specialists and a wide range of after sales through life options, you can be sure that Camlab has our customers best interests at heart.

After sales and through life services

Camlab recognise the importance of providing our customers with a “whole life” solution when purchasing equipment from us. This includes providing technical support, helping select the right products for your needs, the supply of consumables & spares, the provision of warranties & extended warranties, maintenance, servicing, spares, repairs, calibration and single & multi-point temperature mapping. We have experienced field based engineers and a base repair workshop at our facility in Cambridge. This helps Camlab stand apart from many of our competitors.
